Many healing temples will form across the lands  
Leading those in who will open and receive  
The chosen ones will bring light in their hands  
Feeling the ultimate guidance in full force

A new world with war and crime in the past  
Unthinkable beautiful changes not known to man  
Few may run but millions will embrace the power

# Appreciation To All Who Will Or Did Help

Thank you for caring with your blood or your time  
Appreciation is great for money that you grant for food or to rebuild  
Though stories are starting to unfold of name calling and greed  
Just remember these people lived in poverty and most were in need  
Some things were never learned with murder and drugs, a way of life  
No jobs and every day strife  
Hopefully most will thank us for all we have done  
Nature has disrupted so many in a sad way  
Many now there's a chance for all survivors to make a new start  
I hope they can make the right choices and be grateful to all  
But even if they don't thank you  
I thank you for caring from the bottom of my heart

# Are You Ready To Awaken Now

If you are ready to awaken  
Sit and let all go from your mind  
Raise your hands and clap them hard

You feel the power of energy now as you create a ball  
Concentrate as yo feel and see it grow larger  
You have now awakened a new part of you  
Learn more of energy work

# As World Cleanses For New Awakening We Are One

The disasters will grow stronger  
Tragic events will continue though I wish they would stop  
As more fear, tears and sadness last longer  
Through this year and the next will be a test of strength  
As the earth cleanses through this cycle to have mass change  
The time is now to awaken your mind to endure and help thru the length  
Transformative consciousness to connect to the power of light  
Reach your level of oneness and harmony  
Only you can help make this world right so now you must live and learn  
The energetic field is yours for the taking don't remain in darkness  
Feel the most beautiful feeling you could ever imagine  
As your true meaning of life finally awakens

# Wonderful You

You give and give wanting to receive  
But it happens again and again  
With the heartache you grieve  
You must be strong and full of life  
Always remember you one of a kind  
You don't deserve all the tears and strife  
Though struggles with sadness are hard  
You are wonderful and will survive the test  
Life's like a game but we can't deal our cards

# Words

Here they come loaded with pain  
Soaked with the hatred of your minds one way veiw  
Enjoying the evil and all that you gain  
Blinded never to search for peace in your soul  
Always to focus on sadness and gloom  
for heartache and losing control  
Thriving on others just to get by  
Wishing to have a better life  
Not wanting to try

# World Of Change

Here it comes as melting iceburgs fall  
Warmer oceans with higher tides  
And thats not all  
Waterfront properties will need a paddle  
Change of climate is worsening  
To a constant battle  
Too much damage in the world that we live  
I hope its not to late  
For each and everyone of us to care and give

# You Are

You love to swim in the wild with your tube  
Your fingers twitter inviting your full intent  
With a flicker of hope in all who you meet  
Site upon site your friends are invited to the game  
Be careful in all that you say and do in these times  
You are out there for crazed eyes to see  
Many men may have bad intentions  
So much misfortune tears and sadness  
As the internet grows and lures you in

# Your Freind

Your friend is an evil power that has you in his clutch  
You have leaned on him for years  
Now worn and broken and still desiring his touch  
The pain and heartbreak pours out around you  
Tears of sorrow are shed from endless screams  
The time to help yourself is now  
Escape to be a better man and follow your dreams

# Your On Camera

Oh dont you know  
You are on camera  
Everywhere you go.  
In traffic or at the store  
In your neighborhood  
Or by the one you adore  
I spy like a buzzing bee  
Cameras by the thousands  
With evidence in pictures  
In every action of a computer  
Every step shows so much to see
