The Way You Like

Love to lead the way you like and prefer
No holy books to be read and referred
Live it king size and plan for better
Be an ordinary but not accidentally a trend setter

We know exactly where we are heading for
We have understood what an important core is
Since life is mystery and remains unsolved
Some kind of satisfactory formula to be evolved

Life can be viewed from different angle
If possible can be formed in triangle
Two people's union can become reality
It depends upon individual and his ability

Whatever is done and followed
Sometimes it may not be allowed
Yet life is full of adventure
It is in our hand to make it secured

It may not prove roses of bed
You may be compelled to lead
If you can read between lines
Everything else can be pushed in side lines

Life is and can be made colorful
Love it honestly and remain truthful
It is precious and unforgettable gift
All out efforts should be made for it to lift

After all no one can predict its course
It has to be our efforts of course
It must be made full throttle thrust
It is essential, necessary and must
