# Alone

Not alone  
But I feel like that  
Alone in the world  
Thinking of all the memories that I can remember  
Still feeling alone  
Millions and millions of memories  
Not one can change the way I feel  
Thinking and thinking is all I can do  
Alone maybe its only me  
Turn away from problems  
But their still my problems  
I'm still feeling alone, thinking  
and I don't want help for my problems  
GO AWAY  
FADE AWAY

# Change

Who am I?

I'm changing and I know it.

My Clothes, My Pride, My Sound

My mind says I'm over you and the change it only me growing up.

My heart says I'm not over you and thinking if I change you'll come back me. I'm changing and I know it.

For the good or the worst.

# Deep Down In My Soul, My Heart

Deep down in my soul, my heart  
I think about you and me  
What we used to be  
I miss you so much  
I can sleep at night with you on my mind  
I need you back in my life  
I'm living a lie trying to act like I've moved on  
Deep down in my soul, my heart

P/S

I miss you, I need you and I still Love you! ! !

# Hope

had my heart broken  
now i try so hard not to let it happen again  
i know that everyone needs love  
love is hard to find when the quest is long and lonely  
it takes two to make a love so special  
love is always a hope for a better tomorrow

# I Love You Until My Death...

\*You over heard me on the phone

\*Saying there's nothing here for me

\*I know I hurt you so bad

\*And I pray to god he sends me to hell

It started with just a txt then I said it feels like you don't want me to love you

Then you said you were sitting there crying

Well I talked to you just awhile ago and you said your feeling were sad

So you got me writing this song from the bottom of my hart for you

\*So let me hold you one more time

\*And chase those blue days out your hart

\*Oh I saw you next to the pool table

\*And oh my god you were the prettiest thing

-I've ever seen-

[course]

Oh you make me feel like a kid again

Oh I love you until my death

Oh I love you until my death

That night you said you'll pick me up in the morning

And oh my god I was excited

About 2: 45 in the afternoon you seen me by the road

\*I was so happy to see you again

\*Too see you again

\*And hold you in my arms

I tried to kiss you but you said no

I feel so stupid for still trying to kiss you

\*I don't think

\*Well ever be the same

\*Like we use too

Oh I love you until my death

Oh I love you until my death

\*oh baby

\*my sweet baby

\*I love you until my death

# Little Time

Little time going by fast  
Sitting quite hearing the clock go tick  
Boring, slow but reality fast  
Little time going by fast

# Memories

Leaving nothing but memories  
Fading away like tears  
Crying out for help  
No one come  
Alone in the dark  
Feeling unimportant  
But its only because I miss You  
I want to tell  
But nothing will ever be the same  
Trying to forget  
But I made it hard for myself  
Still leaving nothing but memories  
Fading away slow  
That's why I feel this way

# Words

Words unknown and words unsaid  
But silent is all there is  
Keep quite these words  
even if you know they should be said.  
You know these words are the truth  
And these words are silent
