I'm a master's graduate in computer science who enjoys reading and writing while relaxing. I value the purpose of the work I do.

Data Structures And Algorithms

Meeting you
Was my destiny
Learning your methods
Was my responsibility

Overwhelming it is
To Practice
Fun it is
To solve your problems

Dancing through the flowcharts
Choreographing the pseudocodes
Constructing the algorithms
Is the love I have for you

A heartbeat drop
And an adrenaline pump
Is what I experience
When I work with you

You are my lovely
Data Structures and Algorithms!

Save Water

Presence is
In Abundance
If measured
It is 70 percent

Volume is
Two-thirds
Yet consumable
Is a little

Essential for
Every life-form
But humans use
More than sustenance

If so important
It is to us
Why waste it?

It is water, after all
necessitous to
Every being of us!

Save water, save the planet!

Kaushik Reddy Awala

Introspection

Personality,
What kind are you?
Strong or Weak?

Behavior,
What type is yours?
Calm or Violent?

Path,
What is yours?
Straight or Crooked?

Is it time
To Introspect
What's the real you?

Kaushik Reddy Awala

Respect For Time

Time, you're so valuable
You instill meaning
In a life that is unknown

You send a message
Filled with a sense of understanding
When I need it the most

Realizing the fact that
Everything happens for a reason
It makes me content

You're my teacher
You're my best friend
My respect for you
Shall multiply over time

With respect,
a limited-edition human!
