# Cars

## Cars

Almost everybody has one, but what little thought we give them.

We drive our cars to work and school but even then we don't give our cars much thought.

You go from one extreme to the other, one guy might pay about \$20,000 for a car, while another may pay \$150,000 for a car.

Cars are an earthly object, yet we all see people that go overboard with their cars.

# Jack

Jack the fun dog, he loves to have fun.

How gracefully he chases a dirt bike, runs like a tiger in the fields in the afternoon sun.

Jack is a very obedient dog that can be hyper at times.

He enjoys swimming in the water, he swims like a fish and enjoys going to get treats a certain person throws in the pond for him.

OH! ! ! how he hates the rake bark, bark, bark is what you would hear all day long, for the amount of success you would have would be like mowing the lawn with a pair of scissors.

Jack enjoys playing tug-of-war, but he is a hog of what he takes or wins in a match so you must not let him get his mouth or you shall never see it again.

Jack is a very noble looking German Shepard at any distance.

He can be very hyper at times, but he also enjoys the mesmerizing heat of a campfire on a cold winter's night

He will lay there in a heavenly spot just waiting for you to move so he can get on up and follow you wherever you go.

# Life

Life

Life is but a vapor on earth, yet we will live eternity in Heaven or Hell, that is why we all try to live life to the fullest.

Live life in the present, and treat every day like it is your last.

Life is a gift from God, for God loves everyone, and created us in his own image, that is why we try to live life to the fullest.

# Pets

Pets

How joyful they can be while we have them  
they teach us valuable lessons in life  
How sad when they are gone.

Sean Bitikofer

# Sailing

## Sailing

How gracefully the boat moves through the water.  
How peacefully is the sound you hear just the movement of the water around.  
How I enjoy listening to some sailing music while I am sailing in the British Virgin Islands.  
Eating above deck while sailing is an enjoyment of mine.  
Another thing that is fun to do is steer the boat.  
You sit there feeling the cool rush of the nice breeze on your skin.

# Season's

Season's

How cold is the winter season.

How hot is summer in the hot sun.

How beautiful is the fall and spring season's.

Sean Bitikofer

# Sunshine

Sunshine

how she loves to lick you after she eats her food, sometimes you just want to slap her.

Then other times you just want her to keep licking you again and again.

She really enjoys playing with you at times, but she is getting old for that.

She lie next to you when your out sitting by a campfire just wanting to hang out with you.

She really enjoys being pet and being next to you however.

Old Sunny just wants to be your friend.

# Trees

Trees

They are a plant, but we can climb them.

They provide us with shade on a sunny day.

They are a pretty creation of God's

Trees have been around as long as man has been around.

Trees can come in all different shapes and sizes.

Tall and short, fat and skinny.
